

“We do cleaning, plus a whole lot more!”

## ICS GOES **GREEN** TO GET YOUR CARPETS CLEAN

At Innovative Cleaning Services (ICS), we strive to make a difference not only in our customer’s facilities, but in the environment as well. It is for this reason that we have added a **Low Moisture Carpet Cleaning (LMCC) system** to our list of services. The product used for cleaning your carpets is not only Green Seal Certified, but it also leaves your carpets clean and dry within an hour or less!

Here are a few reasons why this process is top notch for carpet cleaning:

- ✓ **Better for the environment** – improved cleaning equates to better indoor air quality and lower microbial activity. This process uses 30 times less water than other wet cleaning processes.
- ✓ **Quick Dry Time** – carpets will dry within the hour or less in most cases. This gives you the benefit of having a fast turnaround time for customers, employees and/or family.
- ✓ **No Chemical Residue** – Green Seal Certified solution uses no hazardous chemicals (phosphate and butyl free), which means no residue and no special handling.
- ✓ **Pile Lifting** – this process uses dual, cylindrical brushes which lift pile while cleaning as opposed to other methods which “flatten” the pile and in some cases void warranties from carpet manufacturers.
- ✓ **No Reappearing Spots** – by eliminating sticky soils and residue, dirt has nothing to cling to, so spots will not reappear.
- ✓ **Peace of Mind** – with LMCC, there are no hoses and/or dealing with soiled water, low noise and if needed, it can be done during business hours.
